ABOUT ME

Software engineer who enjoys solving problems that go beyond straightforward CRUD development. While my recent work has been primarily backend-focused, frontend development remains close to heart, and I enjoy building across the stack when the problem calls for it. I'm drawn to complex engineering problems where thoughtful architecture, performance, and product impact matter more than simply making things work.

PROFESSIONAL EXPERIENCE

Bajaj Finserv Health, Pune

May '25 – Present

Backend Engineer

- **Optimized analytical queries over 70M+ records** using **ClickHouse**, **reducing** response times to **~30ms** and contributing to **~₹2.5 Cr (~\$300K) in annual revenue growth**.
- **Designed a GenAI-powered appointment support chatbot with dedicated intent classification and RAG layers**, reducing per-call token usage from **~7,000 to ~700 (~90%)** while automating customer queries and reducing **customer support costs by ~30%**.
- **Architected an event-driven hospital integration platform** using **Factory and Adapter patterns** to decouple hospital-specific integration logic, enabling integration across **7 hospitals** and processing **100K+ events monthly**.
- **Engineered a large-scale appointment allocation platform for Colgate**, supporting operations generating **~₹1 Cr (~\$120K) in annual revenue**.
- **Developed EMI financing and lead-generation systems** supporting end-to-end customer acquisition workflows and contributing to **~₹80L (~\$95K) in annual revenue**.
- **Built doctor slot management, ranking, and checkout workflows**, improving doctor discoverability and booking efficiency; the enhanced ranking logic **reduced customer escalations and increased successful bookings**.
- **Designed and standardized database architectures and CI/CD workflows** across services, eliminating redundant data storage and reducing unnecessary API management deployments, resulting in **lower infrastructure costs and more consistent release processes**.

EDUCATION

Chitkara University, Himachal Pradesh

2026

Bachelor of Engineering, Computer Science **CGPA – 9.38**

SKILLS

- **Languages:** TypeScript, C++
- **Backend:** Node.js, Express, NestJS, REST APIs
- **Databases:** MongoDB, PostgreSQL, ClickHouse, Redis, Elasticsearch
- **Cloud & DevOps:** AWS, Azure, Kubernetes, Docker, Helm, CI/CD, ArgoCD
- **Frontend:** React, Next.js, Astro.js
